

# TEJAS BOROLE

## Senior Automation Test Engineer (SDET)

Pune, India | +91-7030244959 | tejasborole3@gmail.com | [linkedin.com/in/tejas-borole](https://www.linkedin.com/in/tejas-borole)

### PROFESSIONAL SUMMARY

SDET with **4+ years of experience** in automation testing and building industry-ready automation frameworks integrated with **CI/CD**. Skilled in **E-commerce**, **Telecom**, and **Banking** domain automation with **parallel execution**, and experienced in using **AI tools** (Claude, GitHub Copilot, GitLab Duo) to accelerate and optimize test development.

### CORE SKILLS

- **Programming Languages:** Java, Python, TypeScript
- **AI Tools:** Claude, GitLab Duo, GitHub Copilot
- **Test Automation:** Selenium WebDriver, Playwright, Appium
- **API Testing:** Karate, REST Assured, Postman, JMeter (Performance Testing)
- **Test Frameworks:** JUnit, TestNG, BDD, Cucumber
- **CI/CD Tools:** Jenkins, GitLab CI
- **Version Control:** Git, GitHub
- **Build Tools:** Maven, Gradle
- **Database:** MySQL, SQL
- **Manual Testing:** Functional Testing, Regression Testing, API Testing, Non-Functional Testing
- **Test Management:** Jira Xray, Zephyr
- **Environments:** Windows, Linux

### CERTIFICATIONS

- AWS Certified AI Practitioner
- ISTQB Foundation Level Certification

### PROFESSIONAL EXPERIENCE

#### Senior Automation Test Engineer

Oct 2025 – Present

Accenture, Pune

- Automated cloud-based e-commerce applications across **SAP Commerce (Hybris)**, **Ariba**, **Salesforce Commerce Cloud (SFCC)**, and **Marketing Cloud (SFMC)**, covering end-to-end user journeys including product browsing, cart management, checkout, and payment gateway integrations.
- Designed and built **scalable automation frameworks** from scratch using **Java**, **Selenium WebDriver**, **TestNG**, and the **Page Object Model**, incorporating reusable components, data-driven testing, and custom reporting.
- Built and maintained a **Playwright with TypeScript** framework from scratch, implementing fixtures, reusable page objects, **parallel execution**, cross-browser testing, and environment-based configurations.
- Implemented automation strategies for **smoke**, **sanity**, **regression**, **integration**, and **end-to-end testing**, improving test coverage, execution efficiency, and release quality.
- Developed industry-ready **API automation frameworks** using **Karate** and **REST Assured** for REST API validation, schema verification, authentication, and end-to-end service testing.
- Contributed to **mobile automation framework** development using **Appium** with **Espresso (Android)** and **XCUITest (iOS)** for native and hybrid applications.
- Integrated automation suites with **Git**, **GitHub**, **GitLab**, and **CI/CD pipelines**, with local runner and **Docker** configuration, enabling automated and parallel test execution for faster feedback cycles.
- Developed **accessibility testing suites** using **Axe Core** to identify and report **WCAG compliance** violations across web applications.

- Implemented reporting solutions using **Allure** and **Extent Reports** with SMTP-based automated mail reporting, providing actionable insights into test execution, coverage, and defect trends.
- Leveraged AI-powered tools such as **GitHub Copilot**, **GitLab Duo**, and **Claude** with optimized prompts to accelerate script development and improve overall test productivity.
- Collaborated with cross-functional **Agile teams** in sprint planning, defect triaging, and release validation to ensure high-quality software delivery.

**Automation Test Engineer**  
*Virtusa, Pune*

*Jun 2022 – Oct 2025*

- Delivered **19+ releases** involving UAT and regression testing, producing knowledge transfer documents, test plans, defect summary reports, and lessons-learned documentation.
- Conducted **API testing** using **Postman** and **REST Assured**, validating response codes, headers, and payloads.
- Automated complex UI scenarios for SIT testing using **Playwright with Python**.
- Prepared weekly and monthly project status reports for stakeholders, highlighting key constraints and ensuring on-time delivery, achieving a **95%+ customer satisfaction rate**.
- Collaborated with DevOps teams to integrate test automation into **CI/CD pipelines** using **Jenkins**.
- Improved testing efficiency and coverage by **90%** through automated test scripts built with **Java** and **Selenium**, and ensured data integrity through **SQL**-based backend validation.

**EDUCATION**
